

VENTILATED PHOTOVOLTAIC FAÇADE AND ROOF

+ Electricity Production
+ Energy Saving (between 25% - 40%)
= Internal Rate of Return up to 25%*

" OnyxSolar © has designed a ventilated photovoltaic façade and roof system with undeniable aesthetically value and unbeatable in terms of heat insulation that produces free electricity from the sun. "

* IRR Calculation is dependent on the variables of each building. Please contact our technical department and we will be happy to assess each individual case.
