		<b>ANEXO 1</b>	

Within the scope of the activity of **ONYX SOLAR ENERGY S.L.** as a manufacturer of photovoltaic glass for Building Integration, the company has established an **Integrated Management of Quality and Environment System** characterized by a **Quality and Environmental Policy**. Senior management has established the system, in compliance with the requirements established by the **UNE-EN ISO 9001 and UNE-EN ISO 14001**. This **Quality and Environmental Policy** is based on the following principles:

1. Define, implement and regularly update the **Integrated Management of Quality and Environment System**.
2. As determined by the company's mission statement, employees development is a top priority – through continuous improvement of their personal, technical and management skills, thus boosting the competitiveness of the company with the ultimate goal of achieving a permanent leadership position. There is also commitment to continuous improvement of environmental management system to improve environmental performance, commitment to comply with the legal and other requirements, commitment to environmental protection, included the prevention of pollution and other commitments such as mitigation and adaptation to climate change.
3. The integral customer service is the main asset of **ONYX SOLAR ENERGY S.L.** and what makes it a truly global company, approaching every project from a **multidisciplinary and innovative perspective**.
4. **Integration of environmental criteria** is promoted in the company's activities and business processes.
5. Commitment to provide products and services that **comply** with the requirements of **current regulations**.
6. Developing innovative new products through brainstorming processes affecting all parts involved, as well as prospecting for strategic partnerships to carry out the development of R+D+I projects for **ONYX SOLAR ENERGY S.L.**

The system is aimed towards the following **main objectives**:

- **Customer satisfaction** and executing an **excellent job**.
- Growth as a company, in both product and service Quality, while respecting environmental protection at all times.
- Carrying out activities with the **minimum environmental impact**.

The **Integrated Management of Quality and Environment System** is reviewed periodically by the **Leadership Review System**, to ensure its continuing suitability, adequacy and efficiency. It assesses potential opportunities to improve on the system, products and processes, and detects whether it is necessary to implement changes in the Management System, including its **Integrated Management of Quality and Environment System**.

The **Policy** is available to the public and communicated to all the employees of **ONYX SOLAR ENERGY S.L.**, or contractors carrying out works on behalf of the company, to spread knowledge of its tenets and ensure they are understood and put into practice.
